CAREER PROFILE:

Electrical and Computer Engineering undergraduate pursuing an internship opportunity in Electrical Engineering. Prepared with a solid foundation of knowledge gained through coursework and hands-on projects, eager to apply technical knowledge to innovative team led endeavors while expanding skills during performance.

Programming Languages: Python, JAVA, MATLAB, C++, HTML, Arduino IDE

Proprietary Software Technology: SolidWorks, GitHub, OnShape, Bambu Studio, Microsoft Office, Altium

Soft Skills: Team Coordinator, multi-tasker, Leader

Other Skills: Soldering, Welding, Power tool experience

EXPERIENCE:

MGT– SA, TX

Network Technician - Summers of 2024 & 2025

- Installed and configured hundreds of wireless access points and network switches across over thirty educational institutions to enhance Wi-Fi connectivity
- Developed and configured over four hundred and fifty Unlimited Power Supplies for a sister location in Houston in addition to maintaining work for San Antonio
- Utilized over twenty-five different power tools to execute efficient and secure installations across over dozens of sites

UTSA Research – SA, TX

Researcher - Winter of 2026 & ongoing

- Developing an actuator for 4ft mechanical arm by reorganizing and analyzing dozens of undocumented C-programming files
- Installed new additions to the lab doubling team effectiveness and boosting productivity for all members involved
- Developed a ROS2 connection for a BOTA sensor to communicate real time force data to actuators in an exo-skeleton

EDUCATION:

University Of Texas at San Antonio – San Antonio, TX

Bachelor of Science in Electrical Engineering – Senior

Baylor University- Waco, TX

Bachelor of Science in Electrical Engineering - Freshman

January 2025 – May 2027

GPA: 3.75 (Honor Roll & President's List)

August 2023 – May 2024

GPA: 3.63 (Deans List)

PROJECTS:

MECHANICAL ARM

Lead Programmer - Spring of 2025

- Created an automated arm 1 cubic foot in size. Designed for tabling at UTSA college events, the arm is built to pick up undesired items for immediate and easy disposal
- Led the programming section of the project, resulting in 40% improved power efficiency and brought the required memory down to 50% of initial size
- Installed electrical hardware leading to final completion

MEMBERSHIPS AND VOLUNTEERING:

- San Antonio Food Bank Volunteer
- UTSA Robotics & Automation Society President
